"The latest volume of this excellent series continues in the well-established format with articles to interest both the specialist and the general reader." —CHEMISTRY AND INDUSTRY

ADVANCES IN PHYSICAL ORGANIC CHEMISTRY

Edited by V. GOLD

Associate Editor: D. BETHEL

FROM REVIEWS OF PUBLISHED VOLUMES:

"The authors are all acknowledged experts in their particular fields, and the various chapters give the reader an authoritative and up-to-date account of the different aspects of physical organic chemistry covered. These volumes, which are pleasingly produced, will be of very great use to those working in this rapidly expanding area of chemistry, to whom they can be wholeheartedly recommended."

—SCIENCE PROGRESS

". . . the editor is to be congratulated on his continued success in choosing subjects and authors to provide reviews of wide interest and varied content . . . . This series is a necessity for any well-stocked chemical library, and is likely to find its way onto the shelves of many individual physical-organic chemists."

—TRANSACTIONS OF THE FARADAY SOCIETY

"A high standard of articles and presentation continues to characterize this series." **—CHEMISTRY IN BRITAIN**

Complete information on each volume in the series is available on request.

Take advantage of the convenience of our Continuation Order Plan: Your CONTINUATION ORDER authorizes us to ship and bill each volume automatically, immediately upon publication. This order will remain in effect until cancelled. Please specify volume number with which your order is to begin. Please direct all inquiries and orders to the Sales Department.

ACADEMIC PRESS

A Subsidiary of Harcourt Brace Jovanovich, Publishers

111 FIFTH AVENUE, NEW YORK, N.Y. 10003

24-28 OVAL ROAD, LONDON NW1 7DX

Scientific and Technical publications of

Dowden, Hutchinson, & Ross, Inc.

now distributed exclusively and worldwide by

Academic Press, Inc.

BENCHMARK BOOKS® PUBLISHING PROGRAM

These volumes make accessible to the individual scientist and researcher, as well as to libraries, the key papers in many basic areas of scientific research, forming the very core of any science library. The papers contained in each Benchmark volume are selected by experts for contemporary impact, historical significance, and scientific elegance. Each series will contain from twelve to forty or more volumes of classic and recent papers representing the landmark developments within the particular subject area of the series.

INDIVIDUAL SERIES COVER THE FOLLOWING AREAS:

Animal Behavior
Biological Concepts
Ecology
Genetics
Human Physiology
Microbiology
Systematic and Evolutionary Biology
Geology
Analytical Chemistry
Inorganic Chemistry
Organic Chemistry
Polymer Chemistry
Acoustics
Nuclear Physics
Energy
Optics
Electrical Engineering and Computer Science

A complete list of volumes in each series—as well as other publications of Dowden, Hutchinson & Ross, Inc.—is available from the Academic Press Sales Department.
